How to Effectively Utilize Drills in Field Training

Welcome to a workshop designed to show you the trainer how to successfully incorporate marking and handling drills into your training program. Drills are a vital often overlooked part of field training programs. During this workshop we will cover drills designed to improve marking and teach multiple marking skills, as well as drills designed to teach and advance dogs towards a handling standard. You will have many opportunities to run your dog on various drills over the two days and develop a plan to help you reach your training goals.

Participant dogs must have a reliable retrieve to hand and good obedience skills. Fetch and hold commands will not be covered in this workshop.

This is a working clinic! Bring your dog, a lunch, a chair, a walkie-talkie, an umbrella (and shade for your dog) and raingear if needed.

Registration Deadline: May 15, 2015 or when limit is reached

To register or for more info contact Lianne Daradics at 306-790-7600 or rdaradics@accesscomm.ca or Box 28B R.R.#1, Regina, Sask. S4P 2Z1
