## Rachel Allen

# TTTOUCH WORKSHOP

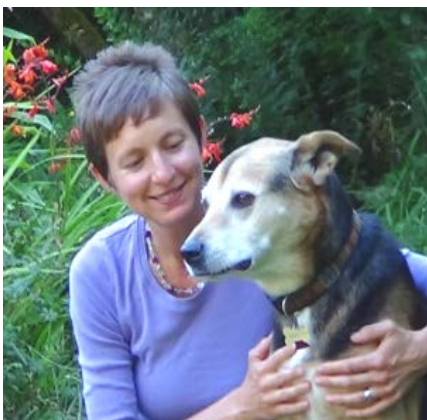

Tellington TTouch Training offers a gentle approach to the care and training of companion animals, horses, farm animals, exotic animals and wildlife. The approach in the field of canines is widely accepted as a powerful method to improve behaviour, enhance performance and health and teach a dog to learn willingly. It helps to establish a deeper rapport and more effective connection and understanding between humans and their animals.

In this workshop, you will learn how to:

- Reduce stress in your dog
- Calming signals: the language of dogs
- Improve concentration and focus
- Relieve "tension patterns" to improve posture, balance, and coordination and address behavioural concerns.

***Dogs need to have valid vaccinations for parvo and distemper (< 3 yrs), or a titer test for parvo and distemper no older than 1 year.***

***MILDLY REACTIVE DOGS WELCOME, subject to pre-screening.***

**Fri 28 Nov 5:30 - 8:30pm (no dogs)**  
**Sat 29 Nov - 9am-4pm (with dogs)**  
**Cost: \$145 +gst**
