

Introduction to Clicker Training and Shaping Behaviour

with Katherine Ferger

FEBRUARY 16, from 12 - 3pm

Learn how to encourage your dog to offer new behaviours, and mark those that you wish to see repeated through a communication method that will have you and your dog speaking the same language. We will begin by discussing the clicker and its relevance in training. Hands-on exercises will enable participants to practice their skills before we work with our dogs.

This workshop is perfect for anyone new to clicker training (no experience required), or who wish to fine-tune their skills.

Prerequisites:

Dogs must have worked in a class environment before and must be crated or stay on a mat in between working sessions. Crating is preferable because you will be working away from your dogs.

Working Spot:
\$65/dog

8464 County Road 27
Barrie, ON, L4N 9C4
