

## **ECHOCARDIOGRAM CLINIC**

with Dr. Regan Williams

Saturday, August 28, 2021

Burlington, ON

(Upper Middle Road/Appleby Line area)

**FEE: \$400 (includes Auscultation, HST, OFA form)**

Like us, you've probably experienced the difficulty in getting specialized veterinary services at this time; there are very few health certification clinics taking place, and in order to keep our breeding programs active, many of us realize the necessity and importance of keeping health clearances up to date.

Dr. Regan Williams, VMD Diplomate, ACVIM (Cardiology) has agreed to assist us with an OFA Echocardiogram Clinic.

- All participants must follow Covid screening protocols and guidelines.
- Owners/Handlers will **NOT** be permitted in exam room (dog will be managed by Dr. Williams and her staff while owners/handlers remain in waiting area/parking lot – dogs must be able to be easily handled/managed by Dr. Williams' team without the owner present).
- This clinic is for **breeding dogs** only. Absolutely no pre-existing conditions will be assessed or discussed. No medications will be dispensed or prescribed.
- No simple Auscultations are being offered, but Auscultation is included in the Echo fee.

We have limited space still available. If you would like to reserve, please let us know, and we will send you a registration form (pending availability) to complete and return. Upon receipt of the form, an appointment time will be assigned, and **prepayment by e-transfer will then be required to confirm your appointment.**

Please contact us for further information or to request registration.
