

Introduction to

*with Red Shadow Breeds'®
Sherry Cooper*

PART ONE (Introduction): Saturday, April 6, 2019 - 9am - 12pm

'Would you like your dogs to live a longer, happier, healthier life?'

Breeders and owners have the power to shape their puppy's final personality traits, frame their future fitness and lengthen their lives by providing important, specific experiences in the first crucial 12 weeks. In this Introduction to Puppy Culture seminar, you will learn to identify behavioural/developmental milestones, such as fear periods, and identify the optimal timing for sound-proofing, problem prevention and structured exercise for your puppy.

PART TWO (Advanced): Saturday, April 6, 2019 - 1pm - 4pm

Even with the very best of intentions and preparation, not every litter goes as planned! With exceptional litters and exceptional puppies come exceptional circumstances that may cause a breeder change their rearing program.

The Advanced Seminar dives deeper into the Puppy Culture protocols with a focus on these exceptional circumstances and how breeders can ensure their puppies meet all the important developmental milestones. Participants will also learn new strategies on vaccination and socialization, spay/neuter/sterilization, singleton puppies, recruiting new owners and Puppy Culture after 12 weeks. New puppy owners will learn how to find the best Breeders and then how to integrate their new canine family member.

Cost is \$38+HST per person, per seminar part.

Groups of 2: \$30+HST per person

Groups of 3 or more: \$25+HST per person.

Group rate available only if paid at one time and in one payment.
