# Introduction to Clicker Training and Shaping Behaviour *with Katherine Fenger*

Working Spot:  
\$65/dog

## PART 1 (starts at @10am)

Learn how to encourage your dog to offer new behaviours, and mark those that you wish to see repeated through a communication method that will have you and your dog speaking the same language. We will begin by discussing the clicker and its relevance in training. Hands-on exercises will enable participants to practice their skills before we work with our dogs.

Prerequisites: Dogs must have worked in a class environment before and must be crated or stay on a mat in between working sessions. Crating is preferable because you will be working away from your dogs.

## PART 2 (starts at 1pm)

Continued learning of clicker training that expands upon skills in Part 1.

Prerequisites: Clicker Training Part 1, or permission of instructor.
