SANDRA BOURNE (Bio)

Sandra has been training dogs professionally since 1995 in the Barrie, Ontario and surrounding areas and in some way most of her life. In May of 2000 she founded Barrie Canine Connection, a full service training, grooming and daycare facility in Barrie, Ontario. Since selling Barrie Canine in 2007, Sandra is concentrating on competitive agility: training and campaigning her own dogs at the National level and World level. She also offers workshops, private lessons and in-home behavioural consultations.

Sandra's interest in training started in childhood, training several show horses and preparing them for competition and pleasure riding. It was a natural transition to start formalizing her interests with dogs. Sandra was always heavily involved with animals of many kinds. Anything furry could be trained and was!

Sandra's current competitive agility dog, Finn, a two year old border collie, is up and coming and having a blast! Was on the WAO world team in 2013. He is a talented, focused young dog with a great future. Finn recently started trialing and testing his skills with great results: earning a DAM Team Qualifier for USDAA 2011 Cynosport, earning a 3rd place overall finish in the 26" regular division at the 2011 Ontario East Regional AAC Championship, and earning placing at Canada Cup and Canadian Open in Alberta. Placing in the top 4 at the 2014 AAC Nationals. Finn also won the 26" Steeplechase finals at the 2014 AAC Nationals

Mya, a tiny 4 pound, 3 year old papillion with spunk and drive to rival the big dogs! Mya competed and the 2014 AAC Regionals and Nationals this year with great success. She brought home some money with placing 2nd in the Steeplechase finals. Sandra attends all the up and coming agility handling seminars from presenters like Justine Davenport, Alen Marekovic and many others over the years. Sandra teaches competitive agility for a living 5 days a week to all shapes and sizes of competitive dogs. Sandra believes there is not one system for every dog but that you should have many tools in your tool box of handling
